

HIGH 5 GAMES™

Casino Platform

High 5 Games products are exceptional and run on our own proprietary digital casino platform for both social and regulated markets. Features are constantly added across all products to work seamlessly together across mobile and desktop

Reputation for creating industry's most popular games

Large volume of games with blockbuster hits

We differentiate ourselves by generating high (game) output, proprietary and third-party, without compromising on quality

Consistently producing smash hits (e.g., Da Vinci Diamonds, Golden Goddess)

Our games and content carry significant brand value across land casinos, cabinets, social, and online - in the US and world wide

Robust, cutting-edge analytics and data-driven player experiences

AI-driven product customization

Individualized Game recommendations

Pricing optimization and nudging techniques

Feature customization based on player bet level and engagement history

Smart triggers for high-probability monetization touch points

Real-time reactive promotions crafting players' journey

Rich event data collection and automated data flows

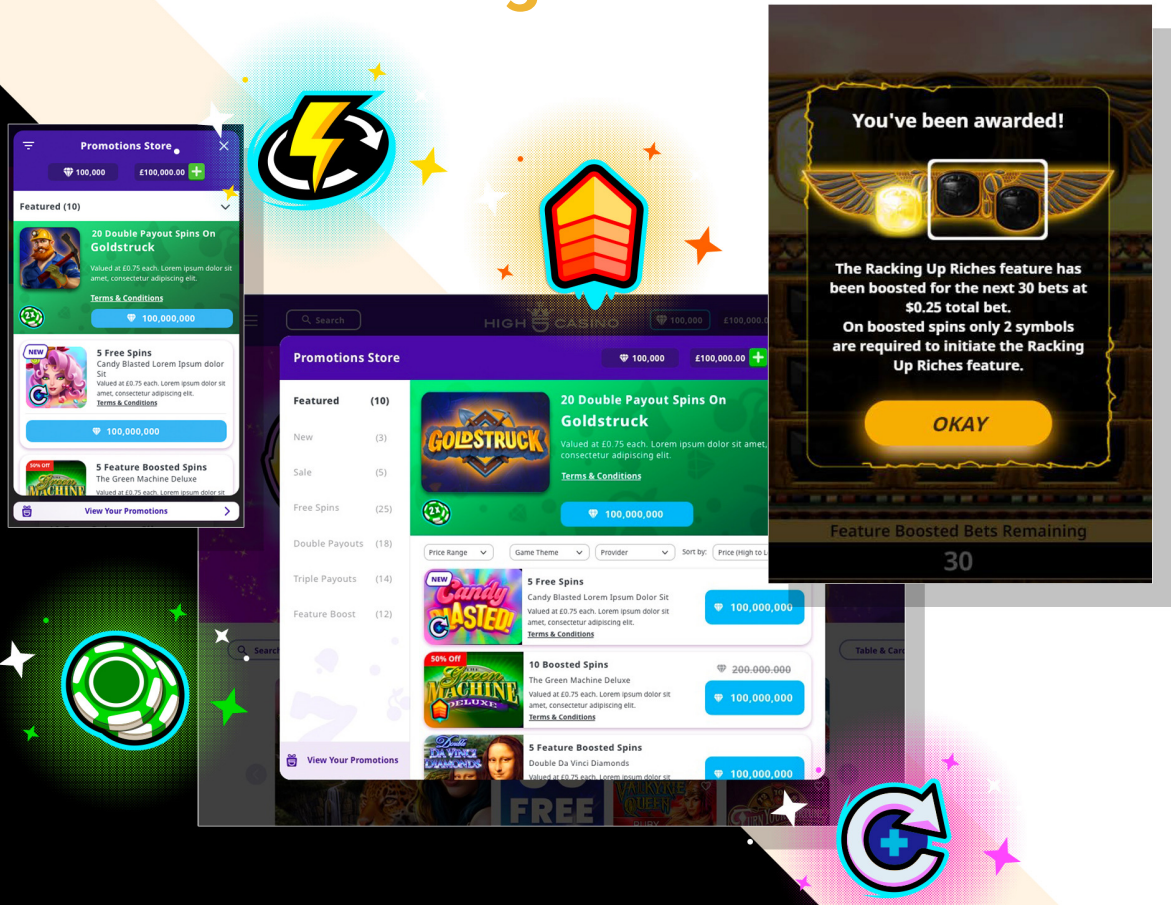

Regular updates of ML models for churn prediction and monetization forecasting

Cross-product flows for increased ecosystem-wide retention and LTV augmentation
